Education

May 2023 – January 2025 **BCs Applied Computer Science**, *Neapolis University Paphos*, Cyprus.
Continue my studies under the JetBrains Software Engineering programme

2019 – 2022 **Applied Computer Science**, *Electrotechnical University "LETI"*, St. Petersburg.

Experience

Jan 2025 — Mar 2026 **Backend software engineer**, *Anastasia labs.*
Worked on various projects, mainly using **Aiken** language, **TypeScript** with **Effect library** and **Haskell**. Implemented fuzzy testing for **smart contracts**, CLI application for a reliable remote node control. Provided support for a back-end of a token drop system and for multiple **Cardano L2** projects, in Haskell and TypeScript respectively.

Skills TypeScript, Haskell, Aiken, Smart Contracts, Docker, Nix, PostgreSQL

May 2024 – Aug 2024 **Google Summer of Code**, *Haskell.org*, Paphos.
Worked on a **Haskell Language Server**, Cabal Plugin Continuation and achieved significant results. Added features like "Cabal-add integration", "go-to definition for modules", "outline view for cabal files" and others, that now are used in the main version of the server. For a more detailed overview feel free to look into **the github gist**.

Skills OpenSource, Haskell, LSP, AST, Compilers

June 2023 — Dec 2023 **Django backend developer**, *Fund-Veles (Charitable Foundation)*, Paphos.
Worked on a project using **Django**, implemented the main project architecture and an internal API. The project aimed to simulate the financial system with the universal basic income. Implemented with **Django REST Framework** and **Swagger**.

Skills Python, Swagger, Django REST Framework, Business Simulation

Main Skills

Advanced Haskell, TypeScript (Effect Framework)

Intermediate Python, Rust, Go, Linux, PostgreSQL

Languages

English **C1**

Russian **Native**
